

Your Solarganizer powered by Milk the Sun

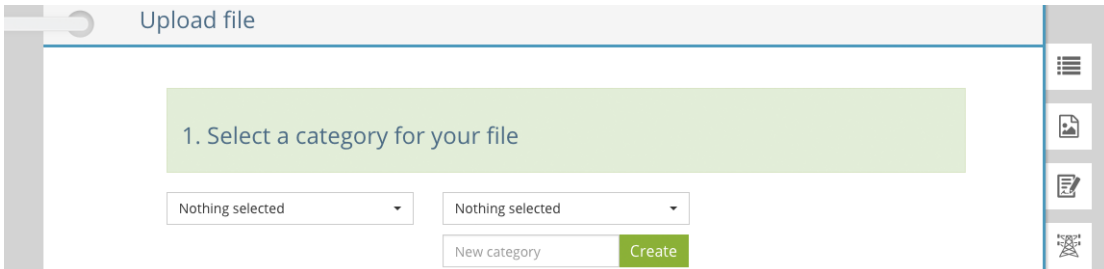

In your personal cockpit **myMilktheSun**, you always have the important dates for your PV system in view and are automatically reminded of them.

You can set and manage the dates and reminders via the free Solarganizer - your storage for all photovoltaic contracts and documents as well as calendars for upcoming deadlines and appointments.

Each of your PV systems has its own data space. In the overview "**My PV Systems**", you can directly access your Solarganizer via the "**Actions**" - "**Please select:**" - "**Manage Documents**" button.

Contract management using drag & drop and keywords

With drag & drop, you can save contracts and other documents in a systematic and categorized way. Keywords are used to automatically sort documents, making them easy to retrieve.

Appointments and automatic reminder

The calendar function of your Solarganizer automatically reminds you of all upcoming dates, such as notice periods, maintenance and cleaning intervals, as well as warranty procedures and deadlines for bookkeeping and tax documents.

To activate the automatic reminder, you must store your specific documents with specific dates. To do this, click on the green calendar sheet „Add reminder“ and enter the date for the next event in the subsequent input mask.
